## THE COMPANY

---

Litostroj Hydro Inc., a rapidly growing subsidiary fully owned by the Wikov Group, is a key player in the hydropower sector. Our approach is marked by a unique style focused on simplicity and efficiency. Strong relationships with various stakeholders are at the core of our projects, and we work with passion and authenticity to achieve our goals. In daily operations, Litostroj Hydro Inc. collaborates closely with a wide network of partners across Canada, the United States, and Europe.

---

## ROLE SUMMARY

---

Reporting to the Head of Field Service, the Site Quality Advisor is responsible for overseeing the quality control of site activities related to the refurbishment and installation of hydroelectric turbines, generators, auxiliary systems, and balance of plant equipment.

This role ensures that all on-site work complies with established quality standards and regulatory requirements by leading quality management processes, conducting audits, and identifying opportunities for improvement.

The Site Quality Advisor plays a key role in supporting the seamless and consistent execution of site projects, helping to maintain efficiency and avoid disruptions.

---

## KEY RESPONSIBILITIES

---

### **SITE QUALITY MANAGEMENT – 90%**

- Act as Litostroj Hydro's quality representative on-site, maintaining a relationship of integrity, trust, and professionalism with customers and local authorities to ensure a high level of satisfaction.
- Collaborate effectively with other site representatives (Site Manager, Technical Field Advisors, OHS Representative, etc.).
- Prepare and manage all quality documentation related to site activities.
- Perform on-site inspections, witness points, and assessments to ensure compliance with applicable quality standards, procedures, and client requirements.
- Coordinate with engineering and office-based quality teams to identify and resolve non-conformities.
- Conduct condition assessments of equipment and installations.
- Inspect incoming materials and components upon delivery to the site.
- Ensure that site instruments and tools are functional and properly calibrated.
- Provide leadership in promoting safety, quality, and performance excellence.
- Consistently uphold and enhance the professional image and reputation of Litostroj Hydro.
- Ensure timely preparation and submission of construction, installation, and commissioning documentation and handover packages.
- Confirm that all quality requirements are clearly understood and that measurements and inspections are properly performed and documented.
- Identify solutions to site issues and determine whether engineering support is required.
- Resolve problems using local resources whenever possible to minimize cost and schedule impacts.

### OFFICE – 10%

- Participate in post-project lessons learned sessions to identify improvement opportunities.
- Between projects, support office-based activities including site preparation, drafting site instructions, reviewing site schedules, and contributing to proposal development.
- Assist with site preparation by defining required tasks, tools, special equipment, and consumables.
- Support the proposals team by estimating site work duration and scope of work.
- Review technical drawings, site schedules, and scopes of work to identify risks and proactively prepare for upcoming projects.

---

## QUALIFICATIONS

---

- Experience as a Site Quality Advisor on construction projects of moderate complexity is considered an asset.
- Ability to demonstrate key successes, challenges faced, and lessons learned.
- Experience working on hydroelectric turbine and generator projects (new installations or refurbishments) is an advantage.
- Confined space training certification.
- Working at heights training.
- Lockout/tagout training.
- First aid training is considered an asset.
- Strong computer skills, including proficiency in MS Excel, MS Project, MS Word, MS Outlook, MS Teams, and PDF editing tools.
- Familiarity with AutoCAD and SolidWorks is considered an asset.
- Bilingual (French/English): Excellent spoken and written English is essential. The role involves regular communication with clients and partners in other Canadian provinces, the United States, and Europe.

---

## WORK CONDITIONS

---

- Work schedules may vary and can reach up to 84 hours per week, depending on project needs.
- The typical rotation is 2 weeks on / 2 weeks off, with workdays ranging from 6 to 10 hours.
- The successful candidate may be based in either the United States or Canada.
